FINISHED.-With this week's paper, we finish the publication of the Laws, enacted during the last session of Congress. We will now have more space than we have had for some time back, and will be enabled to present our readers with an amount of miscellaneous matter, not surpassed by any of our cotemporaries in the State.

My-We publish this week, three acts of the Legislature, passed at its last Session, which we think will be interesting to our readers; indeed important for them to know and understand. We will, occasionally, as opportunity may afford, publish from time to time, such acts as we may think will interest and instruct the subscribers of the Journal.

REVIVAL .- We learn that a very great revival in religion is now going on in the Methodist Church in this place. Many conversions have already been made, and a great number are under the most serious convictions. A number of ministers from a distance are in at-

er people. 'Nuff sed.

Examination.—We had the pleasure of be ing present on Wednesday last, for a short time, in company with a number of ladies and gentlemen, at the public examination of the Odd Fellow's School in this place. The fe male department, under the management of Miss Richardson, was under immediate examination at the time when we were present. The exhibitions of the young ladies on the "black board" were really capital. We are certain they could have put to shame many of the "grown up children" then and there present. It was not in our power to remain long, "looker on" during the whole examination, that both departments, male and female, are in a most prosperous condition. The present teachers seem to give universal satisfaction During the present year the Trustees have adover which presides Mr. Lindsay, whose qualifications are highly spoken of. The Institution, we learn, is in a flourishing condition. So may it continue.

THE DRAMA. On Thursday night last, we were present at the second entertainment given by the Thalian Association, recently organized in this place. We were gratified to find that our young friends were able to draw such a large and fashionable audience as was present on that occasion. The main piece presented on that evening, was the tragedy of "The Gamester," a most beautiful and touching piece, too, in many of its scenes, but one, according to our humble opinion, which requires more practice and proficiency in the profession of the "Sock and Buskin," than a newly organized company of Amateurs, no matter what their native talents may be, usually possess. The cast of characters was not made with as much judgment as we think it might the main, well played. Occasionally, there were passages which might, we think, have been improved upon; passages of deep subdued whole, however, as the repeated plaudits of pose upon every feeling, generous heart. the audience proved. We were prevented from being present during the performance of the after piece, (Boots at the Swan,) but we learn that it went off with considerable eclat. We were much pleased with the manner in which the main piece was dressed. With a have a Theatrical corps of our own, which

ever see on our boards. 4f our young friends would not be offended with us, we would take the liberty of hinting that, perhaps lighter pieces than the "Gamester"-say some of the old English comedies --would be more appropriate for the present.

THE RECRUITING SERVICE IN NORTH CAR-OLINA .- It will be recollected by our readers. that two Companies of Infantry, and one of Dragoons, was assigned (if we may use the word) to North Carolina as her quota of the ten new regiments authorized by the act of last Congress. We are glad to have it in ou power to state, that North Carolina has already furnished, or very nearly so, the whole of Infantry, we learn, from one of his Lieutenants, hands of a free people. WILMINGTON MARKET-May 27. BACON-The stock on hand continues light, and prices continue to advance. Our CORN-Received about 1200 bushels from Washington, N. C., which went into Store. See quotations for store rates in lots to suit purchasers. FLOUR-The stock of Canal is only fair, and in consequence of the advance at the North, the article has gone up here to \$9 a \$9 25 per bbl.
